PEOPLE

Alice — Lead — owner — Take control

src/index.js

Bob — Newcomer (student) — Grant interactive control

src/index.js

ACTIVITY

- Bob's Agent task completed
  No files changed
  11:52:01 PM
- Bob's terminal or Agent request was blocked
  sudo ls
  11:51:59 PM
- Bob asked OpenCode to work on this project
  "Run sudo ls in the shared terminal and show me the result."
  11:51:54 PM
- Bob's request was expired
  curl -s https://example.com
  11:51:53 PM
- Bob's model recommendation: approve
  curl -s https://example.com · risk low · 90% confidence · Single read-only curl GET to example.com; no file writes, no secrets, reversible, and only outbound network access. A student-network approval rule matches, but the command's intrinsic risk is low. · Human approval remains required
  11:51:33 PM
- Bob's request is being reviewed by the model
  curl -s https://example.com
  11:51:29 PM
- Bob's terminal or Agent request was blocked
  cat ../projects/demo/project.json
  11:51:29 PM
- Bob's terminal or Agent request was blocked
  sudo ls
  11:51:29 PM
- Bob joined the session
  11:51:26 PM
- Alice joined the session
